Event Description

The ICIN conference, established in 1989 and praised for the high quality of its technical program and richness of its social networking, is also recognized for its continuous adaptation to emerging technical trends.

For the 2023 edition, ICIN will host an international forum where industry, academia, and standard development organizations will convene to discuss about the emergence and future developments of "Distributed Intelligence across Network and Edge-to-Cloud Continuum" The increasing pervasiveness of data sources heightened by current massive IoT deployments and by the evolution of highly distributed and heterogeneous computing environments shaping the "edge-to-cloud" continuum, as well as the trends toward highly disaggregated network services fostered by the microservice and serverless models, are only some of the many drivers of an unprecedented level of challenges in network service provisioning. These must be addressed by leveraging intelligence at all levels, including network control and management, resource and service orchestration, data plane computing and communication capabilities, assisted/augmented user-network interaction, sustainable and environment-friendly deployment.

The conference will foster discussion about new ideas and approaches for distributed intelligent networks, their enabling technologies and mechanisms to respond to emerging pervasive data-driven networking and processing, immersive connectivity, security and sustainability. This vision will drive the conference to look beyond the current state of the art and promote advances of networks with data, control and management plane flexibility and programmability that foster reliability, optimality and efficiency for applications and services to address future society and business needs.

Interested authors are invited to submit papers presenting novel technical research, business studies in impact, or mechanisms and new technologies, as well as broader position and visionary papers. Contributions that discuss lessons learnt and best practices, describe practical deployment and implementation experiences as well as demonstrating innovative use-cases are also encouraged.

The main technical program of ICIN 2023 will be complemented with Tutorials, keynotes, panel, workshops and demo sessions.

Patronage Packages

Four levels of patronage with benefits are provided to promote your company among international experts and conference attendees. The ICIN 2023 Patronage Chair will work with your company to tailor these patronage packages to maximize the value of the patron opportunity to your circumstances.

As a Patron, your company also becomes eligible to complimentary registrations to the conference, depending on the patronage level.

Level	Fee (EUR)	Benefits Include
Platinum	EUR 7,500	• Three complimentary Full registrations including main conference, workshops, tutorials; • Logo on all conference programs; • Logo on conference website, with link to company's website; • Company-supplied banner prominently displayed during the Conference; • Naming of your company at the opening and closing to highlight the patronage.
Gold	EUR 5,000	• Two complimentary Full registrations for conference; • Logo on all conference programs; • Logo on conference website, with link to company's website; • Company-supplied banner prominently displayed during the Conference; • Naming of your company at the opening and closing to highlight the patronage.
Silver	EUR 3,000	• 50% discount on one full registration; • Company logo on conference website, with link to company's website; • Naming of your company at the opening and closing to highlight the patronage;
Bronze	EUR 2,000	• Company logo on conference website, with link to company's website; • Naming of your company at the opening and closing to highlight the patronage;
